Environmental, Social and Governance Report 2024/25

2024/25年度環境、社會及管治報告

EMISSION

Air Emissions

The Group constantly devote effort in identifying and discovering ways to reduce its greenhouse gas emissions such as by way of upgrading its medical equipment. Without the necessity to operate large machineries, the carbon emission generated from our daily operations is mainly from the consumption of energy and resources, such as electricity power and fuel used for vehicles.

In accordance with government regulations, the Group has adopted a green hospital development policy and implemented low-carbon strategies across all facets of our business. By putting plants that can absorb some poisonous and hazardous gases in hospital areas, we strive to reduce the impact of such gases on the environment. Meanwhile, the Group actively builds sustainable green healthcare, and through facility upgrades and new hospital construction, for example, using “green roof” systems and adopting eco-friendly designs in conjunction with solar energy and wind, hoping to achieve carbon-neutral building operation, we are dedicated to maintaining a green zone.

Employees are encouraged to take public transportation. Meanwhile, our hospitals only provide a limited number of parking lots for in-patients and clients to restrict the traffic flow. Also, we understand that a well-designed arrangement in terms of the ambulances, hospitals vehicles, supply chain transportation is critical to the transportation-related carbon footprint reduction, whilst proper utilization will also help in minimizing unnecessary travel.

The existence of social media (e.g., WeChat), video and web conferencing technologies consolidate the fundamental and facilitate a wider application of telemedicine. We will continue to explore and improve our use of telemedicine as an alternative of face-to-face encounter in the fields such as remote patient monitoring and online medical consultation. These measures are expected to reduce unnecessary travel by the customers significantly.

排放

廢氣排放

本集團不斷努力識別及探索降低溫室氣體排放，例如升級其醫療設備。我們的經營無需使用大型機器，日常經營碳排放主要來自於能源及資源消耗，如電源及汽車耗用之燃料。

根據政府法規，本集團採納了綠色醫院發展政策，並在業務的各個方面實施了低碳戰略。通過將吸收有毒和危險氣體的植物放入醫院區域，儘量減少有毒及有害氣體對環境的影響。同時，本集團積極建設可持續綠色醫療，通過升級設施和新的醫院建設，例如使用「綠色屋頂」系統，採用環保設計，並結合太陽能和風，希望實現碳中和建築操作，致力維護綠色區域。

本集團鼓勵員工乘坐公共交通工具。同時，我們的醫院僅為住院病人及客戶提供有限數量的停車位以限制交通流量。此外，我們明白，根據救護車、醫院車輛及供應鏈運輸作出合理設計的安排乃減少運輸相關碳足跡的必要之舉，而合理使用亦有助於將不必要的差旅減少至最低。

社交媒體（例如微信）及視頻及網絡會議技術的存在鞏固遠程醫療的基礎並促進遠程醫療得到更為廣泛的應用。我們將繼續探索及改進遠程醫療作為面對面接觸的替代方法，應用於遠程患者監護及線上醫療諮詢等領域。該等措施有望大幅減少客戶的非必要差旅。

Environmental, Social and Governance Report 2024/25

2024/25年度環境、社會及管治報告

When it comes to the mobility component of our supply chain management, we frequently buy or procure from local vendors and vendors who use fuel-efficient vehicles. Additionally, we work to reduce the frequency of supply transportation by improving inventory management.

Waste Management

To promote environmental health, advance sustainable environmental development, and focus on achieving harmonious coexistence with the environment, we spare no effort to seek solutions to reduce carbon footprints. Before the authorized municipal environmental sanitation services contractors collect and dispose the general non-hazardous and domestic wastes, responsible staffs are appointed to classify and store them properly.

The collection and disposal of food scraps are separately managed and the assigned staff will oversee the whole process including the recording of waste categories, amount and treatment approaches detailly and comprehensively. The records will be reviewed regularly. In particular, food wastes and leftover are put into designated containers or buckets and will be collected and reused by the third-party collectors. An agreement is entered with third-party collectors to ensure all food wastes and leftover are used for breeding and farming purposes only. Other food wastes such as vegetables, peels, organ meats, which are in the form of raw food or semi-processed food will be treated as domestic waste.

在供應鏈管理的運輸方面，我們傾向於從當地供應商及使用節能運輸方式之供應商購買或採購。此外，我們致力透過更好的存貨控制管理盡量減少供應運輸的頻率。

廢物管理

為促進環境健康和推動可持續的環境發展及專注於實現與環境的和諧共生，我們全力以赴尋找減少碳足跡的解決方案。在獲授權的市政環境衛生服務承包商收集及處理一般無害廢物及生活廢物之前，負責工作人員被指派進行廢物分類及妥善地存放廢物。

食物殘渣的收集及處理是分開管理及獲指派工作人員將監督整個流程，其中包括廢物種類、數量及處理方法等詳細而全面地記錄。所有這些記錄均會定期審閱。特別是食物殘渣及吃剩的食物，會被放入指定的容器或桶內，並由第三方收集商收集及重用。我們與第三方收集商已訂立協議，確保所有食物殘渣及吃剩的食物僅作為養殖及農業用途。其他生食品或半加工食品的食物垃圾，例如蔬菜、果皮及內臟等，則當作生活廢物處理。

Environmental, Social and Governance Report 2024/25

2024/25年度環境、社會及管治報告

The clinical wastes are disposed in strict accordance with the Regulations on the Administration of Medical Wastes and the Measures for Medical Wastes Management of Medical and Health Institutions. Clinical wastes such as infectious waste, pathological waste, surgical waste, medicine waste and chemical waste must be collected and disposed by professional and qualified waste management service providers. The clinical wastes must be treated and transported separately, and temporarily stored in designated storage facilities. The designated storage area shall be sanitized and cleaned thoroughly afterwards. All employees are strictly required to follow the relevant procedures and regulations to prevent the contagion and infection. During the Reporting Period, 0.32¹ tonnes of clinical wastes were generated.

We will continue to look for and apply different waste management strategies in the appropriate growth stage, such as implementing environmentally friendly purchasing practices and avoiding or using harmful materials as little as possible. Mercury, PVC, and unneeded disposable goods are a few examples.

Maintaining Indoor Air Quality

Indoor air quality is one of the significant factors affecting human health as people spend most of the time in indoor area nowadays. Therefore, continuing to improve indoor air quality to reduce indoor air pollutants and thereby reducing air pollution is essential to the employees, clients and other stakeholders. Long term exposure to microbial contaminants will increase the chance of respiratory symptoms, allergies, and asthma, as well as affect the immune system. Therefore, we established strict guidelines for maintaining indoor air ventilation, for the purpose of eliminating microbial contaminants, as well as cross-infection of diseases among patients inside the hospitals. All the ventilation systems are evaluated and examined regularly by professional and licensed employees with relevant knowledge or third-party vendors.

Note:

- (1) As Beijing Huicheng ceased its operation in December 2024 and had dismissed all of its employees, therefore, it is unable to obtain environmental data relating to its business. The disclosed data in relation to the environment will be estimated according to the proportion of the business's revenue from the previous year to the current year (up to the operating period).

臨床廢物乃嚴格按照《醫療廢物管理條例》及《醫療衛生機構醫療廢物管理辦法》處理。臨床廢物(如感染性廢物、病理性廢物、外科廢物、醫藥廢物及化學廢物)須由專業、合資格廢物管理服務供應商進行收集及處理。臨床廢物須分開處理及運輸並臨時存放於指定存儲設施內。指定存放區域於清空後須徹底進行消毒及清潔工作。所有員工必須嚴格按照相關程序及規範執行，以防範傳染病及感染事故發生。於報告期間內，我們的臨床廢物排放量為0.32¹公噸。

我們將繼續在適當的階段尋找和應用不同的廢物管理策略，例如實施環保型採購程序、避免及減少使用有毒物質(例如水銀及PVC)及不必要的一次性產品。

保持室內空氣質素

室內空氣質素乃與人類健康相關的重要因素之一，皆因現今人們大部分時間都在室內區域度過。因此，持續改善室內空氣質素以減少室內空氣污染物，藉此減少空氣污染對員工、客戶及其他利益相關者至關重要。長期暴露於微生物污染物將增加患呼吸道症狀、過敏及哮喘的機會並影響免疫系統。因此，為消除微生物污染物以及醫院內患者之間的疾病交叉感染，我們設有嚴格的保持室內空氣通風指引。所有通風系統均由具有專業技能、執照及相關知識的僱員或第三方供應商定期進行評估及檢查。

附註：

- (1) 由於北京惠城已於2024年12月停止營運並已解僱所有員工，因此未能取得與業務相關的環境數據。披露之環境相關數據將以業務上年度及本年度截至營運期間的收入比例估算。

Environmental, Social and Governance Report 2024/25

2024/25年度環境、社會及管治報告

Proper Sewage Discharge

We have strictly complied with the requirements of the Disinfection Specifications. Water consumed at our hospitals would be treated by the wastewater treatment facilities built in the hospitals. Before being discharged to the municipal wastewater treatment system, the wastewater goes through the grilles, retention basins, septic tanks and sanitizing facilities, and is sanitized with hydrochloric acid and sodium chlorate. To reduce or prevent our employees' exposure to infectious fluid waste, we implemented fluid waste management and strictly monitor the processes.

1,016¹ cubic meters of wastewater were discharged during the Reporting Period. Our water pollution output was below the maximum limit as determined by the Discharge Standard of Water Pollutants for Medical Organization.

Concerted Efforts with Suppliers and Business Partners

With the aim of safeguarding the environment against the arising of the hazardous medical wastes, we have established and adopted a management mechanism with our suppliers and business partners. All medical wastes in forms of drugs and medicines were sorted and stored in designated areas. The medical wastes and domestic wastes are stored separately before being collected and handled by qualified handlers to disposal in a safe manner.

The Group will keep carefully observing and managing the environmental work, as well as reducing the effects of our operations on the environment. To ensure compliance with the most recent revisions to the pertinent laws, rules, and regulations as well as to increase our commitment to environmental preservation, measures will be examined and put into place.

Note:

- (1) As Beijing Huicheng ceased its operation in December 2024 and had dismissed all of its employees, therefore, it is unable to obtain environmental data relating to its business. The disclosed data in relation to the environment will be estimated according to the proportion of the business's revenue from the previous year to the current year (up to the operating period).

妥善的污水排放

我們已嚴格遵循《消毒技術規範》之要求。我們醫院所使用的水資源均須經由醫院設置的污水處理設施進行處理。廢水在排放至市政污水處理系統前，需經過地漏、滯留池、化糞池及淨化設施等程序，並採用鹽酸及氯酸鈉作消毒處理。為減少或防止員工接觸具感染性的液體廢物，我們實施液體廢物管理並嚴格監控流程。

於報告期間，我們排放1,016¹立方米廢水並將水污染物排放控制在《醫療機構水污染排放標準》准許的最高水平內。

與供應商及業務合作夥伴齊心協力

為保護環境免受危險醫療廢物產生的損害，我們已與供應商及業務合作夥伴制定並採用一套管理機制。所有藥物及藥品形式的醫療廢物均於指定區域進行分類及存放。醫療廢物與生活垃圾在合資格處理方收集及處理前分開存放至以安全方式處置。

本集團將繼續仔細觀察和管理環境工作，並減少業務對環境的影響。我們將審查並實施措施，以確保遵守有關最新的相關法律、標準及法規，加強我們對環境保護的承諾。

Adverse weather conditions may paralyze transportation and power systems, leading to insufficient operational resources and energy supply. This will pose a threat to the hospital's operation and endanger the safety of patients.

Concerning the risks mentioned above, we address the challenges posed by climate change beforehand on multiple fronts. Such as, we have already formulated a set of policies and procedures to ensure the supply of electricity and medicine. Meantime, we have also established a set of policy to manage our manpower, to ensure patients' need could be fulfilled at any time. SUPPLY CHAIN MANAGEMENT

The Group's core business is delivering medical services, and it depends on vendors and other providers to maintain normal operations. We firmly believe that building strong and stable, ongoing, and flexible cooperative connections is closely related to our own growth and our partners. To stabilize and strengthen the management of suppliers through responsible procurement, quality control, open tendering, and contract performance, the Group established and put into place a procurement management policy. We had 11 cooperating suppliers as at 31 March 2025, and 10 of them are based in Mainland China and 1 based in Hong Kong. During the Reporting Period, the Group has evaluated all of our suppliers.

In general, the Group has built the Procurement Management System and applied it in all the hospitals, to outline and standardize the specifications and requirements on day-to-day procurement procedures. Besides the consideration of quality and costs of products and services, we tend to choose the suppliers which are closer to our hospitals to reduce transportation costs, risks, as well as carbon footprint.

We are aware that healthcare procurements could lead to great impacts on environment, human rights and public health. We endeavor to achieve responsible purchasing and procuring by engaging and prioritizing vendors who follow sustainable and ethical practices; third-party certified products that meet specified medical standards and pass safety tests; advocating the supplier to take more responsibility so that products are designed to be less disposable and hazardous, and with less wastes and packaging.

供應鏈管理

本集團核心業務為提供醫療服務，需依靠供應商及第三方供應商維持正常運作。我們深信建立穩固、持久且靈活的合作關係與本集團及合作夥伴的發展息息相關。本集團已制定並實行採購管理政策，通過負責任採購、品質監控、透明招標及合約履行等途徑，穩定並強化供應商管理工作。於二零二五年三月三十一日，我們擁有11間合作供應商，其中10間位於中國內地，1間位於香港。報告期間，本集團已對全部供應商進行評估。

一般而言，本集團已建立採購管理制度並將其應用於所有醫院，以概括及規範日常採購程序之規格及要求。除考慮產品及服務質素及成本外，我們傾向選擇離我們的醫院較近之供應商，以減低運輸成本、風險及碳足跡。

我們了解，醫療保健採購會對環境、人權及公共健康產生重大影響。我們通過僱用及優先考慮遵循可持續及道德規例的供應商，從而實現負責任的採購；採購符合指定醫學標準並通過安全測試的第三方認證產品；提倡供應商承擔更多的責任，其產品應減少一次性及危害性設計，並減少廢物及包裝。

Environmental, Social and Governance Report 2024/25

2024/25年度環境、社會及管治報告

In general, for each procurement, at least three vendors will get invitations to participate in the tendering process. The management of the individual hospitals must review and approve the purchase when there are fewer than three vendors. The supply division is in charge of each supplier's annual review and evaluation. These vendors will be removed from our list of authorized suppliers as soon as non-compliances are found if they don't fulfill our standards.

Through structured vendor selection processes with comprehensive and applicable screening criteria, we attain fair operating practices and identify potential risks along the supply chain. We communicate and work closely with our suppliers and business partners as we cling to the belief that this helps to identify potential risks, understand their sustainability strategies, and optimize each other's operating efficiency.

During the Reporting Period, the Group was not aware of any significant environmental and social risks for our management decision on supply chain management.

PRODUCT RESPONSIBILITY

Compliance with Laws and Regulations

As to consolidate its capability of compliance and corporate governance, the Group has been actively promoting policies to prevent and control legal risks, engaging legal advisors, and deepening and optimizing the in-house legal workflow system. The Group strictly complies with all the laws and regulations, and ensure observance of those applicable laws, including but not limited to Regulation on the Administration of Medical Institutions, Detailed Rules for the Implementation of the Regulation on the Administration of Medical Institutions, Regulation on the Handling of Medical Accidents, Law on Doctors of the PRC, and Medicinal Product Administration Law of the PRC.

一般而言，於每次採購，至少有三個供應商被邀請參加投標。倘我們僅可選擇少於三間供應商，各間醫院之管理層須對有關採購作出審閱及授權。供應部門負責每個供應商的年度審查和評估。一旦發現不符合我們的標準的供應商，將從我們的授權供應商列表中剔除。

透過健全之供應商甄選程序（具有全面、適用之篩選準則），我們可實現公平的營運慣例及識別供應鏈的潛在風險。我們與供應商及業務合作夥伴密切溝通及合作，概因我們堅信此舉有助於識別潛在風險、了解其可持續發展戰略及優化彼此之營運效率。

於報告期間，本集團並未發現有關供應鏈管理的管理決策存在任何重大環境及社會風險。

為了保證藥品的品質，藥品由倉庫保管員和品質控制員檢查，並由醫院藥店的藥劑師定期檢查。如果藥物的顏色、味道或一致性發生變化，相關藥物將按照集團的指引棄置。
